President's Message

Well, we "exposed" two of your officers in the last issue so this time I will pick on a couple more, starting with 1st Vice President Ken Hallenbeck. Since Ken started collecting coins in 1942, he says he has little remembrance of what life was **before** coins. When his father was in the service they resided in California, but following the end of World War II he returned to Michigan, attending high school and college there.

Like many a young collector, Ken's interest in his collection waned in favor of other things such as high school sports, but he still preferred to spend spare money on coins instead of girls. It was in college that he did opt for girls, meeting and marrying his wife, June. They had three sons and one daughter and now have several grandchildren. Second son Tom is in the coin business with Ken in Colorado Springs.

After spending two years in the army Ken located in Fort Wayne, Indiana, working for Lincoln National Life Insurance for over twenty years. During that time he was involved in the local coin club, as well as the Indiana State Numismatic Association. He left Fort Wayne in 1977, moving to Colorado Springs to take a job with the American Numismatic Association. After leaving their employment, he served on the Board of Governors and ultimately served a term as President.

Ken's collecting interests are varied and many...ie, odd, curious, and primitive money; credit cards; Colorado tokens; and gaming chips. The list goes on - police and sheriff badges and patches, bonds, and stock certificates - and to quote Ken, "I'm a pack rat at heart." I know for a fact that he is the first one to look for garage sales and/or swap meets when the American Numismatic Association meets in various cities, as he has dragged my husband, Al, to a few of them.

Second, we will learn more about your immediate Past President, Charles Ricard. His interest in coins (and ultimately tokens and medals) started as early as 1938. Whether the coins had anything to do with the occupation he chose, is debateable; his profession since 1948 has been bank auditing and finance. His plans were to retire as of 1 April 1995, giving he and Ruth (his wife of 39 years) time to visit museums and art collections and he knows there are token and medal collections out there waiting to be seen and written about. They want to spend more time seeing "America the Beautiful."

During his high school years in Rochester, New York, Charles' interests were sports. He was on the wrestling and baseball teams. He also did some part time modeling for Eastman Kodak Co.

Two children, Marc and Linnea, do not seem to be following in their father's "numismatics" footsteps. However, Marc does collect leather bound first editions.

A second "hobby" for Charles is Napoleonic art, Napoleonic and military history, and family genealogy. He has quite a collection of miniature American beavers, one of which appears on the Ricard family crest.

Next issue we will "expose" two more unsuspecting officers. There are still a couple of our officers who did not respond to my plea for information concerning their "other life." Hopefully I will hear from them soon.

Our medal design competition did have several entrants this year, which was better than last year when there were **none**. The winning design, which was submitted by TAMS Past President Clifford Mishler, commemorates thirty-five years of our Society. For those of you who have been collecting the series, please do not wait until the convention to let the Medal Chairman know that you want to order the medals.

Clifford's winning design is illustrated on the cover of this issue. In August he will be presented a set of the medals, at the annual TAMS banquet in Anaheim. I hope to see many of you there...

'Til next time,

Dorothy

TAMS Annual Meeting Dates Set

The annual meetings of the Token and Medal Society are held in conjunction with the American Numismatic Association's summer conventions. This year's A.N.A. Convention will 16-20 August in Anaheim, California at the Anaheim Convention Center. Following is a tentative schedule of TAMS events:

Board Meeting:	Wednesday, 16 Aug. at 8:00 AM
Symposium:	Wednesday 16 Aug. at 7:00 PM
General Meeting:	Thursday, 17 Aug. at 1:00 PM.
Awards Banquet:	Thursday, 17 Aug. at 7:00 PM

Members attending the convention should stop by the TAMS information booth to learn the locations of these events, and verify the dates and times. Tickets for the Awards Banquet may be purchased at the TAMS booth.

Volunteers are needed to man the TAMS information booth during the convention. If you can spare several hours (or more), please contact TAMS Secretary Cindy Grellman.

FROM THE BOOKSHELF

by Peter Irion

I have finally found some time to list just a few of the many new book additions that we have received. I still have many more to go. Thanks to all of the authors who have donated books.

The judging for the 1995 TAMS Literary and Cataloging Awards is currently taking place. All authors who submitted books published in 1994 are eligible. I hope no one forgot to submit their books.

On behalf of the officers and members of the Token and Medal Society, I would like to thank the following individuals and organizations for their generous donations to the TAMS Library: Archie Black (JP-AC-1 and several missing issues of JP-AC-1); David Laughlin (JP-AL-3); Jim Hartman (JP-PA-1); Dick Hascom (JP-AL-1); Will Mumford (JP-CC-2 and JP-MD-1); Jonathan Clark (JP-FO-1); Bill Hamm (JP-IK-1); Jim Krucki (JP-MI-1); Bob Heath (JP-NE-1); Al Zaika (JP-NJ-1); Michael Florer (JP-RB-1); Joe Boling (JP-PN-1); Fred Grant (JP-SC-1); C. R. Clark (JP-SE-1); William C. Stump (JP-ST-1); Walter Caldwell (JP-TT-2); Walter Scott (JP-WM-1); Hank Thoele (TH.6); Roland Elie (EL.4); John Kallman (KA.5.b); Michael Brand Zeddies (SP.4); David Bennick (BE.12.b); Merlin K. Malehorn (JP-AT-1, MA.9.a, MA.10. MA.11). Thank you all.

Library Additions

AE.1 American Express Company, FREEDOM MEDALS, 1973, 69 pages. The American Express Company commissioned the Royal Mint of Great Britain to strike a series of 39 medals in commemoration of the American revolution bicentennial. These medals were to be offered exclusively to American Express card members, and this book accom-panied the set. First, a brief history of the beginning of the revolution is given. Then each of the 39 medals is titled and a historical quote on the medal is explained.

The book is divided into three major sections: first plastic and metal pieces, then wooden nickels, and finally Sambo's pieces.

MA.11 Malehorn, Merlin K., LONERS: TAX TOKENS THAT AREN'T. September 1, 1994, 47 pages, illustrated. A catalogue of tokens (metal, plastic and cardboard) and pinbacks, and wooden nickels, that address the topic of taxes, but are not sales-tax tokens, ie: that they are not really associated with the payment of a tax. Pieces are listed alphabetically by key words on the specimens, then fully described. A reference as who or how the piece was reported is also included. Available from Merlin K. Malehorn, 6837 Murray Lane, Annandale, VA 22003.

RO.15 Rowe, C. Francis, James A. Haxby, and Robert J. Graham, THE CURRENCY AND MEDALS OF NEWFOUNDLAND. 1983, 117 pages, illustrated. An extensive history of the paper currency and coinage of Newfoundland, Canada. Much research into the government archives was conducted to obtain this information. The paper notes begin with the initial issue of 1837 by the St. John branch of the Bank Of British North America. The decimal coinage catalog begins with the patterns and trial pieces of 1864. The medals catalog begins with the British Victories in Newfoundland - 1762 medal. Various token issues are also included. An appendix with num-

erous royal coinage acts is included.

SP.4 Spear, Dorothea N., BIBLIOGRAPHY OF AMERICAN DIRECTORIES THROUGH 1860, published by the American Antiquarian Society, 1961, 389 pages. A checklist and bibliography of American city and state directories published through 1860. 1647 entries are listed. Directories are listed alphabetically by city, then year published, and the contents are described.

TH.6 Thoele, Henry C. author, and Peterson, Norman G. editor, HANK THOELE'S ATTRIBUTION GUIDE TO MAKERS TOKENS. 1st edition, October 1994, 51 pages, illustrated. About 2700 attributed BBC and other tokens with maker's marks are listed. The maker's marks include, but are not limited to: Brunswick, Brunswick Balke, Brunswick Balke Collender, Sprague, Pick, Nat. Bil. Co., Strahle, Schmidt, St. Germaine, Kuehl, and Koken. Lists of the rarity of various makers is provided, separated by Chicago makers, St. Louis makers, St. Louis diesinkers, N.Y. State makers, Cincinnati makers, West Coast makers and other makers. An explanation of how to research maverick tokens is included. Much historical information such as location of operation, years of operation, and primary line of business is given. Available from Hank Thoele, 1106 Kenwood St., Green Bay, WI 54304-3807.

WH.3 Whiting, J. R. S., BRITISH COMMEMORATIVE MEDALS, 1973, 236 pages, illustrated. A medallic history of Britain, from Tudor times to the time of the Apollo moon shots. This general survey of British commemorative medals discusses the social, political and artistic evolution of medals through the eyes of the medalist. Several medals from the major eras in British history are chosen and discussed. Much British history is also included.

For Tax Token Collectors

The Jan-Mar 1995 issue of the American Tax Token Society's quarterly publication, *ATTS Newsletter*, has been mailed to members. Included in the twelve page paper, along with the members' advertisements and Society news, is the usual potpourri of articles pertaining to tax tokens.

Among the "new finds" reported in this issue is an interesting piece from Missouri which appears to be a pattern. Struck in zinc, the octagonal, 22mm token's obverse inscription is MISSOURI / 1 / RETAILERS SALES TAX, while the reverse reads STATE OF MISSOURI / 1 / FOREST SMITH (name in script) / STATE AUDITOR. It was discovered by a Missouri collector in a dealer's junk box.

TAMS members interested in obtaining information about the American Tax Token Society should contact the ATTS Editor at 6837 Murray Lane, Annandale, VA 22003. The Society's annual dues are $8.00.

Cannery Tokens Cataloged

The Maryland Token and Medal Society has published a monograph cataloging more than 150 tokens issued by canneries in Dorchester County, Maryland. Written by Moses D. Moore, a life-long resident of Maryland's Eastern Shore, the soft-cover 45 page book, which is printed in large 8½x11 inch format, weaves a history of the lives of those people deeply engaged in the canning industry. The author's narrative is accompanied by more than 175 illustrations of tokens, the canneries that used them, can labels, etc.

Titled *Seafood and Cannery Tokens of Dorchester County, Maryland*, this reference should be of interest to anyone who collects cannery tokens, particularly those issued by Maryland companies. The price of $12.50 includes postage (Maryland residents must add 62¢ sales tax). To order, make check payable to MDTAMS Book Fund and send to Maryland Token and Medal Society, Inc., P.O. Box 3273, Baltimore; MD 21228.

Schenkman to Teach Week-Long Course in U.S. Tokens

A comprehensive week-long course in U.S. tokens is being offered by the American Numismatic Association at its Summer Conference, 8-14 July 1995, on the campus of Colorado College, Colorado Springs, Colorado. This is the second time the course has been presented.

Taught by *TAMS Journal* editor David E. Schenkman, the course opens the door to a fascinating and multifaceted field of numismatics. Participants will discover why token collecting has reached new heights of popularity in recent years, as a wide range of subjects are addressed in depth. Some of the specific topics include Civil War tokens, the "Hard Times" series, merchant counterstamps, embossed "shell" cards, token errors, counterfeits and fantasies, transportation tokens, coal and other "system" scrip, advertising and trade tokens, token manufacturers, and nineteenth century merchant tokens.

Emphasis will be placed on why tokens were used, how they are collected, and what factors determine their value. Students will be encouraged to participate and bring tokens for discussion.

Participants in the conference will also be able to take advantage of the following:

* Evening "bull sessions" with a variety of stimulating topics

* Good conversation with fellow collectors

* Numismatic and scenic tours

* A.N.A. Museum and Library

* Annual A.N.A. Library book sale

The cost of the event, including tuition and room & board (dorm facilities) is just $399 (double) or $449 (single) for members; tuition only is $265 per person. For additional information contact the ANA Educational Department, 818 North Cascade Avenue, Colorado Springs, CO 80903. The telephone number is 719-632-2646 (fax 719-634-4085).

New Catalogs of Municipal Trade Tokens Released

Jean-Guy Cote has published the 1995 (seventh) edition of ***The Handbook of United States Municipal Trade Currency***. Collectors of trade tokens issued by municipalities, counties, and states will find the 68 page, 5½ by 8½ inch format, softbound booklet to be a valuable reference and check list to the series.

Over 2300 tokens are cataloged by denomination and place of issue. Each listing includes the issuing locality, the subject or event commemorated, the date, and the metal(s) in which the piece was struck. In addition, mintages are included when known, and a value has been assigned to over 60% of the listings.

Cote has also compiled his 1995 edition of ***The CTD Pocket Guide Canadian Trade Dollars***. This 50 page reference, which lists the popular series of Canadian trade dollars, is similar in size and format to the catalog of U.S. trade tokens, and includes the same features. Valuations have been assigned to nearly all of the listings. Paper trade notes have also been cataloged, in a separate section of the booklet.

The catalogs are very reasonably priced at $4.74 each, postpaid. They are available from Micro-Art, Ste. 207, P.O. Box 2213, Postal Station P, Toronto, Ontario, Canada M5S 2T2.

TAMS 35th Assemblage Medal

Illustrated on the cover is the obverse of the Token and Medal Society's 1995 assemblage medal, which marks the fact that this is the organization's 35th annual meeting. The other side of the medal, as always, depicts the TAMS logo. This year's meeting will be held during the American Numismatic Association's convention at Anaheim, California, scheduled for 16-20 August.

The 1995 medals are struck on 39mm planchets in bronze, copper, and one ounce .999 fine silver. A special price of $18.00 for a set of three medals is being offered for prepaid orders which are received prior to 1

Manufacturer's Catalog Provides List of Societies

by David E. Schenkman

Recently I received a letter from a librarian in Virginia who was seeking identification of the initials "**A.O.U.W.**" These seemingly enigmatic initials were, as she described them, prominently displayed across a shield which was superimposed on an anchor. The emblem was on a hanging medal which had been brought to the library by a patron who wanted to learn whatever he could about it.

Letters asking for information regarding tokens, medals, and badges arrive here constantly. As one might expect, "what is it worth?" is the most commonly asked question. Frequently, though, the writer wants to know the meaning of an inscription appearing on his item. When the inscription in question is a series of initials, the first place I look is in my ***Illustrated Catalogue of Solid Gold Emblems***. This invaluable reference is the 1928-1929 catalog of J. W. Richardson & Co., a New York City manufacturer of "solid gold emblems, pins, lapel buttons and charms."

Using the catalog's index, it took only a few seconds to determine that the initials "**A.O.U.W.**" stand for "Ancient Order United Workmen." Turning to the page indicated in the index, I found illustrations of two lapel buttons made for the Ancient Order United Workmen. The designs matched the description furnished by the librarian, thus resolving another question with a minimum of time and effort.

While it would be nice to reproduce the 125 pages of Richardson's catalog which are devoted to illustrations of pins, charms, lapel buttons, and badges, this isn't a practical consideration. However, I have decided to print the alphabetical index to the catalog, in the hope that TAMS members will find it a useful tool for identifying medals and badges in their collections.

Many of the listings are found in two places: for example, "Brotherhood of Railroad Trainmen" also appears as "Railroad Trainmen, Brotherhood of." While it might seem redundant to retain both listings, collectors of railroad memorabilia should find it helpful to have all listings relating to "railroad" in one place. To conserve space I have removed the generic listings since "Artists," "Automobile," "Baseball," Druggist," etc. have no research value. I've also removed most listings of officers' badges such as "Past Patron, Eastern Star."

1995 Maui, Hawaii Municipal Token

by Jerry Remick, TAMS 4391

Late in November 1994, the Maui Chamber of Commerce issued their 1995 $1.00 municipal trade token, valid during the year at participating merchants on the island of Maui, Hawaii. This is the fourth in a series of five annual municipal tokens that the Maui Chamber of Commerce is issuing to raise funds for its non-profit education foundation which supports innovative programs in public schools. The Chamber's 1992, 1993, and 1994 municipal token programs have earned more than $25,000 for their Education Foundation.

In 1994, about five tokens out of every 1,000 distributed were spent, indicating that they are, in fact, spendable. The reverse side of the 1995 token depicts a green sea turtle swimming in the sea along with several fish, a star fish, and a dolphin jumping out of the water with a setting sun behind. Part of the shoreline of Maui Island is featured at left above the turtle. Maui Island's slogan, MAUI / NO KA OI (Maui is the best) is at the top and "1995" is at the bottom.

Since being listed as endangered, the green sea turtle has made a remarkable recovery and is now found abundantly in the waters off all Hawaiian Islands. They breed and lay eggs on the far western islands (toward Midway Island) but live in the waters off the main Hawaiian islands. They are a common sight for scuba and snorkel divers, and provide visitors with exciting interplay as they roam the reefs for food just a few meters off the shore.

The obverse of the token predominantly displays the Maui Chamber of Commerce logo, representing the "Lokelani Rose" graphically shown in a stylistic design. This rose is the official Maui Island flower. A large "1"

Standard Catalog of United States Tokens 1700-1900

A review by Dick Grinolds

Authored by Russell Rulau, this 824 page volume is a combination of the five smaller Krause Publications token catalogs plus bare bones Civil War patriotic and storecard sections. The stated intent is to assemble a token catalog along the lines of the *Standard Catalog of World Coins* and the *Standard Catalog of World Paper Money* to serve as the "bible" of the hobby. Not many knowledgeable collectors will worship the result.

The first half of the catalog through the "Civil War Store Cards" section adds some new listings and refinements to detailed listings of the various classic American token series. The second half of the catalog fails badly as the "U.S. Trade Tokens" and "Tokens of the Gay Nineties" sections continue to have major problems. The "Patriotic Civil War Tokens" section is as difficult to use as the "Civil War Store Cards" section is easy.

A good cataloger has to aggressively gather potential listings much as a sponge soaks up water, then filter the collected data through the parameters that define what the catalog will cover. Unfortunately, this author falters in both functions. He chooses not to define the word "token" but to hold it to limitations that are "obvious" but unnamed. The items that are not covered in the catalog are noted; everything else is sifted through this unknown process that results in listings for animal parts (page 83), saw blade bolts (page 279), Santa Claus in the twentieth century (page 730), and numerous other curios.

Simply putting the sections together does not make a "standard catalog," but it does magnify the inconsistencies between the parts. Hard Times satirical and issuer notes are left in, but no Civil War or later issuer chits or scrip are presented. While some of the numerous counterstamps fit nicely into the fixed time periods, the problem is that the vast majority of counterstamp issuers straddle eras or are indeterminate and must be placed by guesswork. Couldn't the I.T. counterstamp (page 64), the A.G. counterstamp (page 130), and the I.H. counterstamp (page 279) all be from the same time period rather than being placed in three different eras? Which period? Counterstamps are a nicely delineated series that were better handled in a straightforward manner by Dr. Brunk than they are here. Serious thought should be given to cutting back sharply on the maverick counterstamps.

It is nice to note that the cigar-smoking eagle pictured on the D. Skidmore Civil War token from Seneca Falls, New York is so popular that it can be found in three different sections of the book (on page 341, where it is valued between $40 and $200, depending on grade; page 535, where it is not valued; and page 732, where "Rare" appears in place of a value).

In the "Early American Tokens" section the inclusion of modern pieces, fantasies, and medalettes is informative, but I wonder why all were given regular catalog numbers. The prices in this section seem to be based somewhat more on auction results than do the valuations in the other sections. The "U.S. Merchant Tokens" section is an amalgamation of the underappreciated "Miller" storecards, Rulau additions, and the omnipresent counterstamps. It might be my imagination, but the tokens of this era no longer seem to have the cohesiveness of style that demarcated the period. Possibly this is why interest in the series has waned.

Hard Times tokens do need a reworking of catalog numbers, but too many people collect the original 164 tokens listed by Lyman Low (and pseudo-Low listings as well) to drop his numbering system entirely from the main text. While Low numbers are not quite as sacred as some may think, it seems a bit arrogant to dump the classic numbers and substitute a system that assigns numbers to animal horn boxes (HT 90) and pocket pieces (HT 382) the same as Loco Foco tokens. A rearrangement, expansion, and pairing of the enlarged photos would greatly aid the casual user in determining varieties. The pricing of the low to mid-range rarity tokens is generous; most of these tokens can regularly be found at significantly lower prices.

It is telling that the new "Civil War Store Cards" section is the most useful. The pricing in this section is defensible against real world comparisons and is actually a touch conservative. This cannot be said about any other section. On the other hand, the "Patriotic Civil War Tokens" section is not particularly user friendly. Save yourself some frustration and instead buy the Civil War Token Society's *Die Photos & Fuld/Moore Listings; Update of Fourth Revised Edition, Patriotic Civil War Tokens* for $7.50 -- the photos are larger and you don't have to translate die numbers back and forth.

"U.S. Trade Tokens" and "Tokens of the Gay Nineties" continue to be by far the weakest links in the Rulau series, as the coverage of these sections is oversold from the start -- "as complete as today's research

can make them." The bibliography of the catalog is impressive on first glance, but obvious errors and glaring omissions in the listings lead you to take a second look and conclude that the author is just not familiar with the current literature. The rubbing of the Hurricane Coal Store token on page 669 is listed as a "Gay Nineties" issue from Murphrysboro, Illinois, but a simple check of *Edkins Catalogue of United States Coal Company Store Scrip*, the "bible" on coal tokens for over twenty years, shows that the token is attributed to either Energy or Fordville, Illinois and is dated on the reverse with a 1903, 1915 or 1919 date. This twentieth century piece should not have been listed at all, while other legitimate nineteenth century coal tokens are nowhere to be found.

Geo. Brehm's Brewery is listed in Brooklyn, New York, but a cursory glance at *American Breweries* or the *Maryland Merchant Tokens* catalog would show this to be a well-known Baltimore brewery. Comments made after the W. R. Skidmore (page 664) and Ginzel Mercantile Co. (page 672) listings indicate the author has not read David Schenkman's *Bimetallic Trade Tokens of the United States* catalog or his detailed article in the *TAMS Journal* on the same subject. Information from the Colorado and Oregon catalogs, among numerous others not cited in the bibliography, would only help clarify these anemic sections.

In discussions with me over the years, Russ Rulau and Chet Krause indicated that their method was to publish the first edition of a catalog earlier rather than later in the information gathering process. This would generate feedback and new listings, so as to produce a greatly expanded and improved second edition. My contention, voiced to them, has been that this shortchanges the purchaser of the first edition, as easily obtained listings are not included and it does not guarantee that these listings will be submitted for the next edition. Why should we assume that the users are more interested in improving the catalog than the author is?

The author should be more aggressive in seeking new listings on his own rather that waiting for them to be submitted to him. While there are numerous listings from Alaska in the "Gay Nineties" section, most of the tokens were made by Seattle die sinkers. However there are only four tokens listed from the entire state of Washington. Even though George Chatham's catalog of Mississippi tokens is still available, Rulau's catalog includes only three 1890s listings from that state. Accurately expanding these sections should not be a problem as almost all catalogers, good and bad, use previously published materials. This cataloger is no exception; note the expansion of the Nevada "Gay Nineties" section in the second edition, after the *Nevada Trade Tokens* catalog was published. (This, of course, is also how errors in listings last for generations unless individual items are verified.) This is accepted practice as long as one does not appropriate material for oneself without full credit being given where credit is due and permission obtained when needed.

One of the keys to working with tokens from 1866 to the present is an intimate knowledge of die styles and the die sinkers that produced them. An experienced special consultant in this area could help clarify the last two sections. The M. R. & M. Club token (page 552) is listed as "probably struck by J. F. W. Dorman" (although the illustrated token was struck with a Koehler "stock" reverse die) and we are referred to "similar" tokens, including the C. Zimmerman piece which is listed and illustrated on the next page. As can be seen by a comparison of the two tokens' illustrations, they are not similar at all. The Zimmerman token utilizes a reverse die which is signed by Koehler.

On page 744 we find the large aluminum token of the Prince Furniture Co. attributed as a product of Francis X. Koehler, even though that die sinker died before aluminum was used to strike trade tokens. In fact, the token was struck by Dorman and the die work is typical of his twentieth century work.

The Central Exchange token (page 512) is tentatively assigned to New York State based on die style, but the same style is used on tokens from Minneapolis (Mps 22, page 695), Chicago, Philadelphia, Washington, D.C. (several tokens of this style are illustrated in *Merchant Tokens of Washington, D.C.*), and elsewhere. The Johnny's Cafe pieces (page 641) attributed to Newport Beach, California are obvious errors as they are actually from Newport, Kentucky, from the mid-twentieth century, and were made by a Kentucky die sinker.

Unlike the author, who does not buy or sell tokens but has "an intimate knowledge of valuations," I do buy and sell tokens and can only say that dependence solely on the pricing in this catalog could cost you a lot of money, whether buying or selling. If you sold the P. W. Lewis token (page 499) for the full $500 catalog value you would leave a lot of money on the table. Although I never owned this piece, as the catalog states, I did handle its sale for the owner at the 1983 ANA for a price in excess of $2500. There are current widely published buy ads offering $4500 or more for this token. If you bought the W. & H. token (page 551) at the $400 catalog price, you would be very disappointed when you tried to sell the piece. These are not isolated examples. Everyone has their own idea of

(concluded on page 107)

MAVERICKS

Having recently upgraded my personal computer to add a CD-ROM drive, I also added two programs which promise to be of value in researching mavericks. The first is a national residential telephone directory on two disks, east and west. Any directory like this is of limited value, since not all listings are contained, people move, and it is fairly current. However, if a token contains an unusual name, the directory may yield a small number of listings (hopefully concentrated in one area), and a phone call or letter of inquiry may produce someone who knows of the token issuer.

The second program is a mapping program which covers the entire United States in considerable detail. At the highest level of magnification, one inch equals 200 meters or a little over a tenth of a mile. Streets and roads are named, even in small towns and rural areas. In larger towns, a specific address can even be located. Unfortunately, the indexing program supplied with the disk cannot locate a particular street name unless you give it an area to search of about four by five miles. That means you must have a pretty good idea of the street's location, or be prepared to do a lot of searching. If you have an address given as the corner of two streets, and suspect the token is from a specific town, it can be shown whether the two streets do intersect in that town. Of course street names and addressing schemes change over the years, but this program can help in the continuing search for attributions.

This month's column shows several tokens with conflicting attributions. I am sure that the token is from (at best) only one of the contending locations; the true source may not even be listed here. Always keep in mind much of the attribution work we do in this column is only tentative. Just because we find a listing for a "Joe Blow" in some directory does not prove that the "J. Blow" maverick is from the same person.

To have mavericks listed in this column, mail them (not more than 25 at a time, please) to the Maverick Editor at the address below. Please do not send "initials-or numbers-only" mavericks or other pieces with only a slim chance of being attributed. Since photographs or rubbings do not reproduce adequately, please send me the actual tokens to photograph. Package them securely, and include a check or stamps to cover return postage and insurance, indicating the insurance valuation you desire.

West Virginia Merchant Token Catalog Nears Completion

David E. Schenkman is nearing completion of a catalog of the merchant tokens and trade checks of West Virginia. The book will provide exact descriptions of all known tokens, and will include such features as extensive historical annotations, illustrations of many tokens, and a price guide. Coal mine company store tokens will not be listed in the reference, since they are cataloged in *Edkins Catalogue of United States Coal Company Scrip*. However, lumber company tokens will be included.

To date well over three thousand tokens have been cataloged. However, the assistance of all members is needed to make the book as complete as possible. You can help by sending exact line descriptions, including size in millimeters and metals, of your West Virginia tokens. All contributors will be acknowledged in the book. Correspondence should be sent to David E. Schenkman, P.O. Box 366, Bryantown, Maryland, 20617.

1995 Maui Municipal Token

(concluded from page 100)

with"ONE" across it is superimposed on the rose. GOOD FOR ONE DOLLAR / IN TRADE AT PARTICIPATING / MERCHANTS DURING / 1995 is below the rose in small letters. ONE MAUI TRADE DOLLAR / THE VALLEY ISLE is around the outer part.

Struck by Continental Coin Corporation of Van Nuys, California, mintages and metals for the 39mm, milled edged, token are 135,000 in copper-nickel, 2,500 in 22 carat electroplated gold plated copper-nickel, and 2,500 in one ounce .999 silver. Copper-nickel specimens are in uncirculated condition, except for a limited number struck in proof for the boxed set of three metals. Gold plated and pure silver specimens are in proof with matt surfaces on the design and lettering. Gold plated and pure silver specimens are encapsulated and housed in velvet presentation cases.

Ordering information for this and previous issues may be obtained by writing the Maui Trade Dollar Association, P.O. Box 631, Lahaina, Maui, Hawaii 96767-0631.

TAMS 35th Assemblage Medal

(concluded from page 94)

August. If you do not intend to pick up the medals at the convention, add $2.00 for shipping. After 1 August the price will increase to $20.00 (plus $2.00 if shipping is desired).

TAMS members wishing to purchase these medals are urged to take advantage of the discount price by ordering prior to 1 August. Orders, and inquiries about the availability of previous years' TAMS medals, should be sent to TAMS Medal Chairman Al Baber, 611 Oakwood Way, El Cajon, CA 92021.

Standard Catalog of U.S. Tokens

(concluded from page 102)

pricing but a "standard catalog" should not vary by multiples from prices in the real world.

We all know that Chet Krause and Clifford Mishler are dedicated to numismatics in general and to tokens and medals in particular. Their contributions to and support of the hobby have not been exceeded. It may play against the conventional wisdom of bigger and better, but I hope that they will seriously consider cutting back this work-in-progress to a workable scale. I would suggest the following: 1) Tighten up the commentary in the first four sections and eliminate the items that require guesswork as to date. Delete the knick-knacks. 2) Ask the Civil War Token Society to provide a usable Patriotic Tokens section. 3) Eliminate the post-Civil War listings. These tokens do not lend themselves to the crosscut saw type of cataloging that works in the earlier defined time periods. These tokens are better cataloged in a linear manner by state and specialty catalogs -- they do not fit well in artificial time periods. As one of the lucky few people who get to work with these tokens on a daily basis, do I refer to this catalog? -- Yes, just as I do many other sources. Do I rely on it? -- No.

THE MARKETPLACE

Each member is entitled to one free Marketplace ad of 25 words per issue. Additional words (or additional ads) are accepted, but must be accompanied by payment of 10¢ per word. Ads over 25 words which are not accompanied by payment will be edited to the 25 word limit.

TAMS Slide Programs

TAMS now has five slide programs for free loan for TAMS members. Each program is shipped in a Kodak "carousel" with the slides in place, along with a typed narrative. Several programs also include a taped (uncued) narrative.

Programs include "The Case of the Misplaced Soda Token," a general token and medal program (heavy in Civil War), Hard Times Tokens, Civil War storecards and Civil War patriotics. It is suggested that the borrower arrange to have a Kodak Carousel projector before requesting any of these programs.

TAMS also has a repeating program and self-contained Caramate projector especially designed for use at coin or collectible shows.

When returning any program, at borrower's expense, the member is requested to enclose a check for the original shipping charge. Inquiries and requests (please write at least three weeks prior to scheduled showing including your street address) may be sent to:

INFORMATION FOR ADVERTISERS

Advertising Restrictions

All advertisers must subscribe to the TAMS code of ethical standards. The editor is vested with the right to reject any offered advertising which he feels is not in keeping with the best objectives of TAMS. All advertisers must supply their own cuts or art work, unless other arrangements are made. All ads are priced on a CASH IN ADVANCE basis. Further information regarding advertising is available by writing to the editor.

Classified Advertising

Each member may submit one free classified ad, up to a maximum of 25 words, per issue. Each word or group of numbers counts as one word, as does the zip code. Ads larger than 25 words are accepted but payment for the extra words, at the rate of 10¢ per word, must accompany the ad. Ads over 25 words which are not accompanied by payment will be edited to the 25 word limit, without exception.

Mail Bid Ads

It is recommended that closing dates in mail bid ads be set six weeks following the listed issue date in which it is to be inserted. While the Token and Medal Society endeavors to place issues in the hands of its members no later than three weeks following the issue date, it assumes no responsibility for doing so. All mail bids must include any rules that apply to that sale. The term "usual rules" is not acceptable.

Advertising Rates

(Please note: the rates listed below are for camera ready copy only. There is an extra charge for layout and typing, and arrangements must be made in advance with the editor.)

CONTRACT RATES
